City of Saint Paul | Forestry Tree Work Permit Application - 2021

Department of Parks and Recreation

Forestry Unit

1100 Hamline Avenue North, Saint Paul MN 55108-2614

Phone: (651) 266-6400 Fax: (651) 632-5115 Email: forestry@ci.stpaul.mn.us

Application

Please read the terms and conditions of tree work found on the back of this document prior to completing the application. Forestry will review the permit application and determine if a permit will be issued.

Address/Location: _____

Property Owner: _____

Phone Number: _____ Email: _____

Applicant/Contractor (if different than above): _____

Phone Number: _____ Email: _____

Type of Tree Permit Requested (work other than tree planting and sculpting must be completed by a City licensed tree contractor):

Planting

Pesticide/Fungicide Treatment

Sculpture

Removal

Trimming

Other: Stump Grinding

Tree Contractor: _____ Saint Paul License Number: _____

Phone Number: _____ Email: _____

Location of Tree(s): _____

Describe Proposed Tree Work (for treatment, list chemical name(s) and application method; for planting, list proposed tree species):

Grind stump(s) of tree removed in 2021 and replace with new tree.

Proposed tree species:

Comments: _____

*Permit is granted under the below provisions and the terms and conditions on the reverse of this form and is subject to inspection by Forestry.

Permit Application Is Denied

Reason: _____

Authorized Forestry Staff

Date

THIS PERMIT EXPIRES SIX (6) MONTHS FROM THE DATE OF ISSUANCE

Provisions: **1)** The person to whom this permit is issued, agrees to do the work according to the terms of this permit established on page 2 and to be personally and directly responsible for all damages to persons or property arising from the work hereby permitted or authorized to be done while agreeing to indemnify and hold the City of Saint Paul harmless from any loss, claim, damage, or expenses arising therefrom. The said person further agrees to repair all disturbances of public grounds, if disturbed by permit holder under this permit, to the satisfaction of the Director of Parks and Recreation and in case the permit holder fails or neglects to do so, that the said Director may have the work of restoration performed and the permit holder hereby agrees to pay said costs thereof; **2)** Damage to tree(s) located on public grounds is subject to restitution as determined by the Forestry Manager-City Code Chapter 176, "Preservation and Protection of Trees;" **3)** Trees removed from public grounds are subject to replacement or compensation equal to the value of the tree(s) as determined using the latest edition of the "Minnesota Supplement to the Guide for Plant Appraisal;" **4) Revision-January 2021**

Terms and Conditions - 2021

Planting

Permits for planting on public property are subject to review by Forestry based on site conditions and planting goals outlined in the Street and Park Tree Master Plan. Underground utilities must be located prior to planting.

1. **Tree Stock** must be cultivated nursery stock with a form typical of the species and not less than one and one half (1.5) inches in diameter, measured six (6) inches above the ground.
2. **Underground Utilities Must Be Located** by the Property Owner by contacting Gopher State One Call at (651) 454-0002 or (800) 252-1166 before a permit application will be reviewed. Utility locates are valid for fourteen (14) calendar days and must be renewed if planting does not occur within this time. This is a free service.
3. **Tree Planting Locations** shall be determined by Forestry after utilities have been located.
4. **Inspection** by Forestry of the permitted tree(s) may occur after planting; improperly planted trees or trees that do not meet tree stock requirements must be corrected. The applicant will be notified by Forestry if correction is needed.

Decorative Lighting

Lighting and power cords shall be loosely placed on trees. Fasteners, including but not limited to nails and staples, shall not be used to attach lighting to trees. Trees shall not be pruned to facilitate the installation of lighting or power cords. Decorative lighting must be removed by April 1st to allow for tree growth and prevent damage to trunks and branches.

Tree Sculpture

Tree Sculptures require design approval and the property owner to carry a liability rider on their insurance policy. Work must be performed by an insured sculptor. Additional application materials are required. Contact the Forestry office at (651) 266-6400 for further details.

Bracing

Bracing in a public tree shall only be installed by Forestry. Upon review, Forestry shall determine the need for bracing, the type of bracing to be installed, or if other work may be necessary including trimming or removal of the tree.

THE FOLLOWING TREE WORK ON PUBLIC PROPERTY MUST BE COMPLETED BY A LICENSED TREE CONTRACTOR

A list of City licensed contractors is available from the Department of Safety and Inspections at (651) 266-8989. The applicant to whom the permit is issued is responsible for the disposal of all tree waste generated by the trimming or removal of the public tree(s), stump(s), and root(s).

Removals

Trees on public property are removed to promote public safety and mitigate unsound or damaged tree structure. Trees that are dead or exhibit declining health or disease, invasive species, or in conflict with right of way construction projects are also subject to removal. In most cases, trees that provide value to the urban landscape and benefit the community will not be removed. The final decision to remove a tree rests with Forestry.

1. **Tree Removals** on public land must include stump removal.
2. **Stumps/Roots** must be removed to a depth of at least 8 inches below ground level and the hole refilled with topsoil. Underground utilities must be located prior to stump or root removal by calling Gopher State One Call at (651) 454-0002 or (800) 252-1166. This is a free service.
3. **Trees Removed** from public grounds are subject to replacement or compensation equal to the value of the tree(s) as determined by the Forestry Manager-City Code Chapter 176 using the latest edition of the "Minnesota Supplement to the Guide for Plant Appraisal."

Chemical Injections and Other Treatments

Chemical injections shall be done by a City licensed contractor using a trunk injection system (soil drenches are not an approved application method). Treatment does not guarantee that the tree will not be removed in the future.

1. **Any Treatment** to public tree(s) does not preclude removal of the tree(s) if condemned under any "Shade Tree Disease Control Ordinance" or other City ordinance. Any treatment must meet current ANSI A300 Arboricultural Standards.

Pruning

Public boulevard trees are pruned to promote proper tree structure and to remove dead, damaged, and unsound wood.

1. **Pruning** shall comply with the ANSI A300 standards. Make all cuts sharp and clean. When removing heavy limbs, cut from the underside first, then make the second cut a few inches further out on the branch, to avoid tearing wood and bark down the branch or trunk. Topping and pollarding are not allowed practices.
2. **Timing** for pruning must follow recommended pruning schedules to reduce the spread of insects and disease. Oak, honeylocust, elm, and crabapple should only be pruned November-March while trees are dormant.
3. **Damaged or Loose Bark** should be cut away using a sharp knife or chisel, leaving no sharp corners, to a location at which live bark clings tightly to the trunk.
4. **Lower Limbs** should be removed to form a symmetrical shape and allow 16' of clearance on the street and sidewalk side.
5. **Thinning** should only be done to remove damaged, weakened, and diseased branches or to improve the structure of the tree. Remove the least desirable of any crossing or rubbing branches. Wounds should not be painted. Exceptions: oak tree wounds should be painted April 1 to July 1; honeylocust and fruit tree wounds should be painted during the growing season.
